

TELL IT YOUR STORY

You already know your story.

Say it in a sentence. sparx switches on the parts that make it real.

I want to start a salon for people, where they can book appointments and order online. I'll share what I know on a blog. I also remember every customer.

FIND ME AT bella-salon.sparx.zone

"I run a **food shop** — order online, pick up locally, ship anywhere. I also supply other businesses." green-grocer.sparx.zone

"I run a **consultancy** — clients book time, I send an invoice and get paid, and I stay in touch." finch-advisory.sparx.zone

"I want to start a **fitness studio** — sign-ups for classes, orders online, and I remember everyone." north-loop-fitness.sparx.zone

Whoever you are, it's already for you. Pay only for the parts your story needs.

Start with a spark. Switch on the rest when you're ready.

Switch a part on and it joins the story you already have. No migration, no second login, no re-typing. Switch it off and your data stays exactly where it is. Pay for the parts you use, nothing else.

Builder Pick a theme before coffee. Your site is live on a real URL five minutes later. \$10/mo	Commerce A customer checks out at 7:12 AM. The order, the receipt and the stock all move at once. \$49/mo	CMS Write the post once. It becomes a page, a search result and Friday's newsletter. \$49/mo	CRM Dana's third order sits beside every message she's ever sent you. \$49/mo	Email Receipts send themselves. The newsletter goes to the same list, no export. \$29/mo
B2B Northwind signs in, sees their own price list and orders on net 30. \$99/mo	Invoicing A quote becomes an invoice becomes a paid link, without re-typing a line. included	Dropship Your supplier ships the tote bags. Tracking lands on the order by itself. \$29/mo	Inventory The last beanjie sells at the counter; the website marks it low stock. included	Live Chat "Back in my size?" You answer and send a checkout link in the same window. \$19/mo
Scheduling Tuesday at 2 fills itself, takes the deposit and sends the reminder. \$29/mo	AI One AI answers your customers. Yours answers you with today's real numbers. \$49/mo	SEO Titles, sitemaps and schema ship with every page you publish. Free. free	Automations Order over \$500? Tag the buyer, alert you, skip the evening busywork. free	Your stack, one bill. Three modules on beats four subscriptions stitched together, every month. sparx.works
7:12 AM An order lands before you open. Stock, payment and the customer record update themselves.	10:40 AM A wholesale buyer asks for pricing. Their price list and net terms are already applied.	1:15 PM A post becomes a newsletter. Write once in the CMS, send without re-typing a word.	4:50 PM Your AI answers with real data. Native MCP means live orders, not a stale export.	6:18 PM You go home. It keeps working. Reports agree, lists are current, tomorrow is queued.
